

Photo shows an RGB Clarissa design custom built for an individual RGB homeowner with three dormers which are options to the standard plan. Refer to the floor plan for standard plan features which you may customize to make your new RGB home everything you want it to be.

The Clarissa Design

As if the sprawling covered porch and gazebo were not enough to make this home your favorite — its generous proportions, sun-filled rooms, 4 spacious bedrooms, 2 1/2 baths, and classic center-hall design would certainly put it at the top of your list.

SQUARE FOOTAGE SUMMARY*

1st floor	1,576
2nd floor	1,100
Finished living space	2,676
Unfinished Bonus Room	304
Optional Basement	1,576
Two-car Garage	500

Expect the formal 2-story foyer, with its oak-railed balcony and stairs, to provide an elegant welcome — while it separates the social activities of the living room from the quiet enjoyment of the library. And knowing that everyone migrates to the kitchen, you'll appreciate the kitchen's center island, its open access to the family room, and the snack-time convenience of having the breakfast bay nearby.

Upstairs, 3 bedrooms enjoy easy access to the hall bath, while your personal suite is a private retreat with a soaking tub, walk-in closet and the opportunity for more — with bonus space you can finish-off at any time for working at home, as a work-out room, or for just relaxing in an environment created to be exclusively your own.

And note that the steeply-pitched roof allows you to add an optional walk-up attic with dormers, for additional living or storage room.
